

BE PART OF SOMETHING DIFFERENT

THE COMPANY

Cornerstone Research Group Inc. (CRG) is a team of innovative, high-performing scientists and engineers who work together to invent, develop, and mature materials technologies from concept to marketplace. These goals are accomplished through the drive and creativity of employees. The CRG team is comprised of individuals with diverse educational experiences, personalities, and backgrounds. They work both independently and in group situations while taking on real responsibilities, making decisions, and creating opportunities to further their work in the company and in the research community.

"We design next-generation technology. We're not redoing what's already been done. We're looking at what's new. This is about continual learning. People here face design challenges, and there are not always easy answers."

"I get to work with lots of different types of people to meet the goals of each project. The sense of camaraderie is great. We're together to get the job done. I feel good being part of a team and accomplishing our goals as a group. We're like a family."

THE ADVANTAGE

The CRG corporate culture encourages initiative, candor, constructive conflict, and an entrepreneurial spirit. Team members are expected to seek out business opportunities, bring in new research projects, and anticipate customers' current and future needs. Research professionals assist with business development and mentor junior research engineers. Servant leadership is the norm. In an energetic atmosphere, employees design their own careers while participating in technology and business at national and international levels.

With constant interaction among science, engineering and business disciplines, successful communication is essential to the team. From student interns to Ph.D.s, CRG's employees are the key to the company's rapid growth and ongoing success.

GO BEYOND

CORNERSTONE RESEARCH GROUP, INC.

"I want to be on the cutting edge. We're excited about creating new ideas here. You're not just another ant in the colony. You're doing things."

THE COMMUNITY

CRG is located in Dayton, Ohio, the birthplace of aviation and the home of many famous artists, writers and inventors. Dayton and the Greater Miami Valley offer many benefits for both living and working:

- Great public and private school systems
- Very affordable cost of living
- Three nearby international airports
- Outdoor activities (bike paths, state parks, hiking)
- Visual and performing arts communities
- Nationally recognized universities and colleges
- Rural, suburban, and urban settings
- Close proximity to other large cities, including Cincinnati and Columbus
